

# SUNNY GEEK SHEET

Hi, my name is Sunny and here are some of the geeky details about what makes me a great fit for your project.

## For the Geeks

- Sustainable solution that powers your jobsite trailer.
- Flexible and built to adjust in size to fit your jobsite trailer needs.
- Compatible with most office trailers.
- The solar panels on two skids power one double-wide trailer.
- Reduces your carbon footprint.
- A hybrid microgrid that allows you to be off-grid.
- Rechargeable battery system that stores collected solar energy.
- Back-up generator can be used to re-charge batteries.
- Can exceed 90-percent energy savings compared to a traditional diesel generator.
- Project-specific dashboard that tracks energy usage.
- Signage package.

-  Two of my skids will power your double-wide trailer.
-  I am a microgrid with my own power system.
-  I have a backup generator to recharge my batteries when needed.
-  I have a dashboard for tracking how much energy I'm producing.

I am a part of Whiting-Turner's commitment to **innovation, continuous improvement and building a brighter future!**
